KALIMANTAN SELATAN

NDPBA PROVINCE PROFILE

KALIMANTAN SELATAN

CAPITAL: BANJARMASIN

Area: 38,744 km²

Kalimantan Selatan (South Kalimantan) on the island of Borneo is a region of agricultural and extractive activities affected by both frequent wildland fires and

flooding. Despite the province's very low hazard exposure ranking, the capital city of Banjarmasin and surrounding areas encounter frequent fires. Improvements in clean water and sanitation access, health, transportation and economic capacity will ensure the geographically and culturally diverse region is equipped to counter the effects of future hazards and climate change.

RISK AND VULNERABILITY COMPONENT SCORE

MULTI-HAZARD RISK (MHR) - Very Low

Score: 0.379 • Rank: 33/34

RESILIENCE (R) - Very High

Score: 0.608 • Rank: 2/34

MULTI-HAZARD EXPOSURE (MHE) - Very Low

Score: 0.342 • Rank: 28/34

VULNERABILITY (V) - Low

Score: 0.427 • Rank: 20/34

COPING CAPACITY (CC) - High

Score: 0.532 • Rank: 10/34

MULTI-HAZARD RISK (MHR)

33 / 34

RANK WITHIN PROVINCES
Score: 0.379

Kalimantan Selatan's Very Low Multi-hazard Risk score and ranking are due to Very Low Multi-hazard exposure combined with Low Vulnerability, High Coping Capacity, and Very High Disaster Management Capabilities scores.

Multi-hazard risk component scores compared to overall average country scores:

KALIMANTAN SELATAN RECOMMENDATIONS

1

Clean Water Access Vulnerability

Kalimantan Selatan has the 7th highest Clean Water Access Vulnerability in Indonesia, driven by the 3rd lowest access to an Improved Water Source (69.5% of households), and the 17th lowest access to Improved Sanitation services (76.6% of households). The province is also exposed to multiple hazards, including extreme weather, drought, wildfires, landslides, flooding and flash flooding.

Continue collaboration and coordination among local government ministries, NGOs and community-based organizations to implement strategies to expand improvements in clean water, sanitation and hygiene throughout the province.

Secure investments to strengthen existing clean water and sanitation infrastructure to reduce hazard-related impacts (e.g., repair or replace pipes to reduce leakage in drought prone areas and reduce likelihood of health hazards and spread of communicable diseases due to contamination during floods).

2

Vulnerable Health Status

Findings show Kalimantan Selatan ranks 12th for overall Vulnerable Health Status and 12th for Infectious Diseases. Malaria, dengue and measles are the most prevalent infectious diseases. The province has the 5th highest percentage of children under the age of 5 experiencing wasting or severe wasting (13.1%).

Improved water and sanitation in the country will reduce the incidence of diarrheal disease, a contributor to child mortality and wasting, reduce vulnerabilities linked to disaster impacts, and reduce overall health care costs.

Enhance water management practices to protect water supplies (watershed and catchment areas), reduce waste, and reduce or eliminate mosquito-borne disease vectors.

KALIMANTAN SELATAN RECOMMENDATIONS

3

Economic Capacity

Kalimantan Selatan ranks 11th for overall Economic Capacity. While Labor Force Participation is relatively high (69.41%), GDP per Capita (33.5 million IDR) and Average Monthly Income (2.8 million IDR) could be strengthened.

Implement programs that diversify the economy to generate public revenue, increase household incomes, and support small businesses.

Increase access to financing and support structures (e.g. microfinance services and loans) for informal sector enterprises.

4

Transportation Capacity

Kalimantan Selatan ranks 15th for overall Transportation Capacity. Secure funding for new and improved transportation networks. Investments in transportation capacity will have the added benefits of expanding clean water access and sanitation service delivery, increasing access to health care, improving market accessibility for farmers, and facilitating disaster management operations.

KALIMANTAN SELATAN RECOMMENDATIONS

5

Mass Care Support

Increasing supplies of Disaster Equipment (e.g., vehicles, shelter equipment, communications equipment) would bolster Kalimantan Selatan's capabilities to coordinate and manage the care needs of disaster affected populations.

6

Emergency Services

Emergency Services capabilities in Kalimantan Selatan could be strengthened through increased participation and training of Search and Rescue personnel and expanding firefighting infrastructure, equipment and personnel. The Average Distance to a Fire Station in the province is 48.5 km.

**Better solutions.
Fewer disasters.**

Safer world.
