PORT OF SPAIN

NDPBA MUNICIPALITIES PROFILE

TRINIDAD AND TOBAGO

PORT OF SPAIN

CAPITAL: PORT OF SPAIN

Area: 12 km²

The City of Port of Spain is the nation’s capital and one of the smallest and fourth least populous municipalities/regional corporations in the country. Port of Spain is bordered by Diego Martin to the north, San Juan-Laventille to the east, and the Gulf of Paria along its southwest-facing shore. Geographic features include the Northern Range to the north and the Gulf of Paria to the south. Land use is predominantly urban, including residential, commercial and recreational. Primary economic drivers are retail and distribution sectors, and finance, insurance, real-estate and business services.

Coping Capacity

PORT OF SPAIN RECOMMENDATIONS

1

Population Pressures

Port of Spain has the highest overall Population Pressures ranking in Trinidad and Tobago, with the most significant changes in Average Annual Population (-2.6%) and Net Migration Rate (-141 per 1,000 persons). Despite its declining population, Port of Spain remains the most densely populated municipality in the country.

A declining population can leave gaps in social support systems and contribute to a loss of intellectual capital and skilled labor, affecting the economy and its growth potential.

Strengthen planning efforts to identify vulnerabilities related to the changing population and implement programs and support systems to address them, which may include vocational, technical or entrepreneurial training programs, services to alleviate poverty, or enhanced policing in areas susceptible to criminal activity.

2

Vulnerable Health Status

Port of Spain has the highest overall Vulnerable Health Status ranking in the country, driven by the highest Infectious Disease ranking, the highest percentage of Disabled persons, the highest percentage of Population in Collective Living Quarters, and the second highest percentage of those reporting one or more Chronic Illnesses. Those in poor health or with special needs often suffer disproportionately due to the negative consequences of a disaster. Strengthen community outreach programs to identify residents who may require extra assistance or supplies to adequately prepare for a disaster or need help to mobilize during an evacuation.

Include special considerations in disaster management and sheltering plans for those with chronic health conditions, mobility challenges or other disabilities. These individuals will require extra precautions to protect against transmission of COVID-19 during sheltering.

Reduce the financial burden incurred by high out-of-pocket (OOP) health care expenses by expanding risk pools for health spending. This may prevent delays in addressing serious health conditions by those with limited financial resources.

PORT OF SPAIN RECOMMENDATIONS

3

Governance

Port of Spain has the 3rd lowest overall Governance ranking in the country, with the highest Crime Rate (over 520 serious crimes reported per 10,000 persons) and the 3rd lowest Voter Participation Rate (31%).

Continue implementation of the Ministry of National Security's (MNS) Citizen Security Programme (CSP) to strengthen institutional capacities of the MNS and local police, build public confidence and citizen support of measures to improve safety and security, and coordinate implementation of community-based crime prevention strategies.

Garner support for increased public security through law enforcement presence and surveillance, youth education, community service and personal safety programs.

4

Environmental Capacity

Port of Spain has the 2nd lowest Environmental Capacity ranking in the country, with just over a half-percent (.53%) of the municipality designated as a Protected Area.

Identify areas for designation as green belts, parks or other natural area buffers to provide protection from hazard impacts (i.e., improve drainage), especially in heavily populated or industrialized areas.

**Better solutions.
Fewer disasters.**

Safer world.
