SANTA CRUZ RECOMMENDATIONS

Population Pressures

Santa Cruz Province experienced the largest average annual population increase between 2010 and 2019 (3.2%). As population growth steadily increases, closely monitor development to prevent environmental stress and ensure that resource and infrastructure needs are met. Incorporate multi-hazard mapping and risk assessment into land-use plans and zoning regulations to reduce and prevent development in hazardprone areas of the Province.

Gender Inequality

Focus efforts to support equal labor participation by diversifying economic opportunities for women in the Province. Promote social benefit programs that support single parents with children.

Encourage women to participate in the disaster management planning and decision-making process through inclusion community emergency brigades and representation in local government.

SANTA CRUZ RECOMMENDATIONS

Transportation Capacity

Low road network density may reduce the connectivity of people, goods, and services to the Santa Cruz Province during a disaster. Invest in transportation infrastructure to facilitate the distribution of resources and services before, during, and after a disaster.

Disaster Management Capabilities

Pursue public-private partnerships to increase radiobase access to increase availability, security, and resilience of disaster communications. Focus on building community and volunteer fire and emergency response corps. Identify government or external resources to conduct emergency services training and conduct Provincelevel exercise on a regular basis.

Better solutions. Fewer disasters.
