VULNERABILITY (V)

RANK: 42 / 77 DISTRICTS ASSESSED SCORE: 0.433

Vulnerability in Taplejung is primarily driven by Food Insecurity and Vulnerable Health Status. The bar charts indicate the socioeconomic themes contributing to the overall Vulnerability score.

RESILIENCE (R)

RANK: 43 / 77 DISTRICTS ASSESSED SCORE: 0.474

Taplejung's score and ranking are due to Moderate Vulnerability combined with Low Coping Capacity scores.

Below are the four thematic areas with the weakest relative scores:

Food Insecurity

Vulnerable Health Status

Energy Capacity

Communications Capacity

KEY FACTORS INFLUENCING RESILIENCE

Food Insecurity

The changing frequency and intensity of disasters can expose the entire food system to supply chain disruptions. Promoting resilient agricultural systems through training of local farmers in sustainable practices (e.g., soil improvement, erosion reduction) and improving efficiencies in food marketing, storage, delivery, and waste management will help to increase the nutrition and food security of present and future generations.

Vulnerable Health Status

A population with a compromised health status will have a greatly reduced ability to manage short- and long-term disaster outcomes. Improving health is often correlated with decreased susceptibility to injury, disease, and stress associated with disasters. Acute or prolonged vulnerable health status limits the basic capacity of response functions.

Energy Capacity

Homes, businesses, industry, and government all rely on access to energy resources for continuity of daily activities. Expanding, strengthening, and securing the energy network and increasing the availability and quantity of energy reserves will contribute to economic development and increase the speed of recovery processes in the aftermath of a disaster.

Communications Capacity

The density, diversity, resilience, and quality of communications infrastructure influence how subnational- and local-level populations are able to facilitate effective and coordinated communication.

MULTI-HAZARD RISK (MHR)

63 / 77 RANK WITHIN DISTRICTS Score: 0.469

Taplejung's score and ranking are due to Very Low Multi-hazard Exposure combined with Moderate Vulnerability and Low Coping Capacity scores.

Multi-hazard risk component scores compared to overall average country scores: Multi-Hazard Exposure 0.356 0.559 Vulnerability 0.433 0.463 Coping Capacity 0.381 0.381 0.436

Better solutions. Fewer disasters.

Safer vorld.
