

# Peru: Regional Profiles

National Disaster Preparedness Baseline Assessment

**Region: Moquegua**

Region Capital: Moquegua  
Region Area: 17,286 km<sup>2</sup>

Moquegua is one of twenty-five regions in Peru, and is located in southern coastal Peru. Moquegua’s primary economic activities are manufacturing and mining of oil, gas and minerals. Moquegua is the regional capital. As of 2015, the region’s population was estimated at 180,477; with the highest percentage of its population residing in the province of Mariscal Nieto. Relative to the rest of Peru, the population of Moquegua has higher than average life expectancy (75.8 years) and access to improved water (96.4%), while having lower than average illiteracy (4.8%) and poverty (8.7%).

**Multi-Hazard Risk (MHR) <sup>1</sup>**

**Score = 0.394, Rank = 24 of 25**

Of the twenty-five regions of Peru, Moquegua ranks 24th in multi-hazard risk (MHR = 0.394). Table 1 outlines the individual components that contribute to risk. As shown, Moquegua’s very low multi-hazard risk is a function of its low multi-hazard exposure (MHE = 0.421), low vulnerability (V = 0.356), and very high coping capacity (CC = 0.594). The ternary graph at right shows that Moquegua’s exposure, vulnerability and lack of coping capacity are all lower than the national averages for these components.

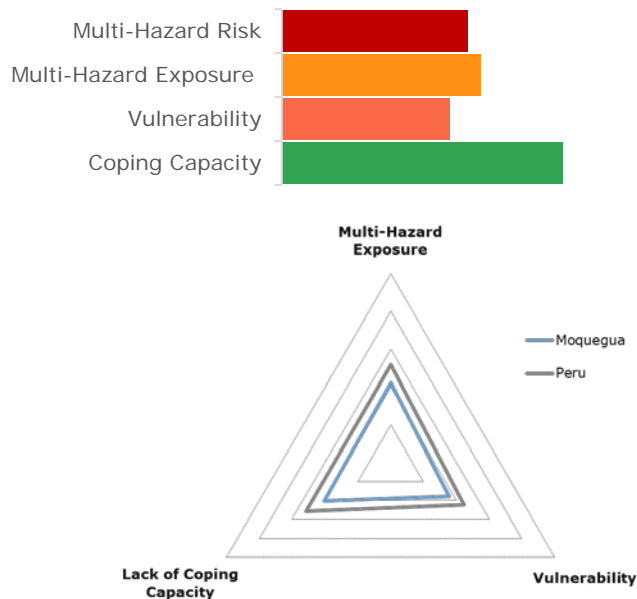

Figure 1. Components of the Multi-Hazard Risk Score compared to the national average.

<sup>1</sup> **Multi-Hazard Risk:** The likelihood of losses or disruptions to a region’s normal function due to interaction between multi-hazard exposure, socioeconomic vulnerability and coping capacity.

## Components of Multi-Hazard Risk (MHR) <sup>2</sup>

Table 1. Scores and ranks for each component of the Multi-Hazard Risk Score.

Multi-Hazard Exposure (MHE)		Vulnerability (V)		Coping Capacity (CC)	
Low		Low		Very High	
Score	Rank (of 25)	Score	Rank (of 25)	Score	Rank (of 25)
0.421	16	0.356	20	0.594	5

### Multi-Hazard Exposure (MHE) <sup>3</sup>

Score = 0.421, Rank = 16 of 25

Moquegua has low multi-hazard exposure relative to other regions of Peru (MHE = 0.421). Percentages of the region's population exposed to varying hazards are summarized below.

Table 2. Estimated ambient population<sup>4</sup> exposed to each hazard type.

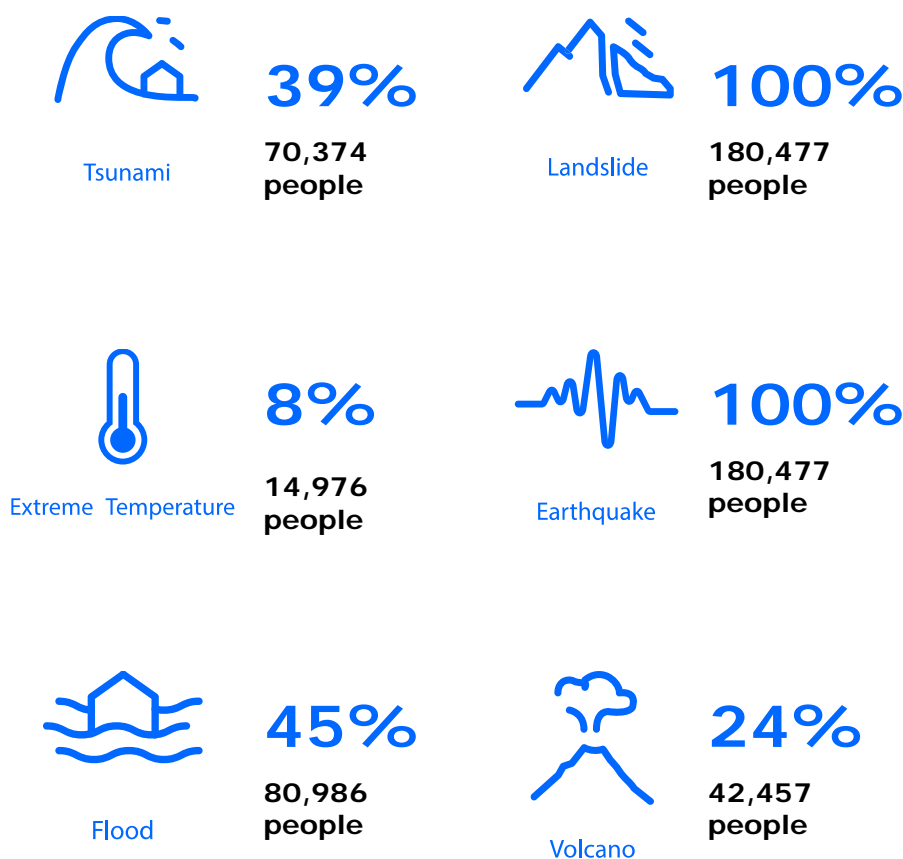

Figure 2. Average, raw and relative Multi-Hazard Exposure Scores.

<sup>2</sup>  $MHR = (MHE + V + (1-CC))/3$ .

<sup>3</sup> **Multi-Hazard Exposure:** Average exposure of the population to hazards.

<sup>4</sup> **Ambient Population:** 24-hour average estimate of the population; typically differs from census population.

## Vulnerability (V) <sup>5</sup>

Score = 0.356, Rank = 20 of 25

Moquegua has low vulnerability relative to other Peruvian regions (V = 0.356). The bar chart on the right displays the composition of its overall Vulnerability Score. As shown, vulnerability in Moquegua is driven primarily by recent disaster impacts, population pressures, and gender inequality. The table below summarizes the individual indicators within each socio-economic theme.

Figure 3. Components of the Vulnerability Score by relative contribution.

Table 3. Indicators of vulnerability grouped by theme.

	<b>Environmental Stress</b>	<b>1.8</b> % of total regional area with irrigation-fed agriculture	<b>8.3</b> % of total regional area with severe erosion				
	<b>Vulnerable Health Status</b>	<b>13.3</b> Infant mortality rate per 1k births	<b>101.5</b> Maternal deaths per 100k births	<b>75.8</b> Average life expectancy (years) at birth	<b>4.1</b> % of children under 5 years of age that are malnourished	<b>6.6</b> % of population with 1 or more disability	
	<b>Clean Water Vulnerability</b>	<b>96.4</b> % households with access to improved water	<b>83.1</b> % households with access to flush toilets				
	<b>Information Access Vulnerability</b>	<b>4.8</b> % of population 15yrs and older that are illiterate	<b>10.3</b> Average years of schooling	<b>83.6</b> % primary school enrollment	<b>22.0</b> % households with internet	<b>87.2</b> % households with television	<b>87.6</b> % households with radio
	<b>Economic Constraints</b>	<b>0.44</b> Ratio of dependents to working age population (15-64 years)	<b>44.31</b> Ratio of average monthly household expenses to income	<b>8.7</b> % of population monetarily impoverished			
	<b>Gender Inequality</b>	<b>0.47</b> Proportion of female representatives in local government	<b>0.79</b> Ratio of female to male secondary enrollment	<b>0.79</b> Ratio of female to male labor participation			

<sup>5</sup> **Vulnerability:** The socioeconomic conditions that are associated with susceptibility to disruptions in a region's normal functions.

**Population Pressures**

**1.1**  
% Average annual population change (2010-2015)

**Recent Disaster Impacts**

**945.0**  
Average annual hazard-related deaths per 10k persons (2010-2014)

**8.4**  
Average annual number of homes destroyed by recent hazards per 10k persons (2010-2014)

**Coping Capacity (CC) <sup>6</sup>**

**Score = 0.594, Rank = 5 of 25**

Moquegua has a very high coping capacity relative to other regions (CC = 0.594). The bar chart on the right displays the composition of its overall Coping Capacity Score. As shown, coping capacity in Moquegua is hindered primarily by its environmental capacity and governance. The table below summarizes the individual indicators within each socio-economic theme.

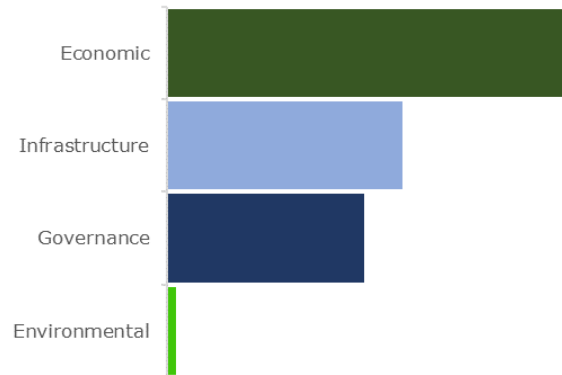

Figure 4. Components of the Coping Capacity Score by relative contribution.

Table 4. Indicators of coping capacity grouped by theme.

**Economic Capacity**

**\$1,824**  
Average monthly income (\$)

**\$47,564**  
Gross domestic product per capita

**Governance**

**2.52**  
Registered cases of sexual violence per 10k persons

**3.36**  
Registered cases of missing persons per 10k persons

**0.015**  
Average annual number of social conflicts per 10k persons (active and resolved)

**7,282**  
# of voters per 10k persons (2014 election)

**Environmental Capacity**

**0.8**  
% protected or reforested land

<sup>6</sup> **Coping Capacity:** The systems, means and abilities of a region to absorb and respond to events that could potentially disrupt normal function.

**Infrastructure Capacity**

	<b>Healthcare Capacity</b>	<b>20.8</b> # of hospital beds per 10k persons	<b>30.4</b> # of nurses per 10k persons	<b>14.9</b> # of physicians per 10k persons
	<b>Communications Capacity</b>	<b>15.4</b> % households with fixed phone line	<b>83.9</b> % households with mobile phone	
	<b>Transportation Capacity</b>	<b>1.7</b> Port/airport density per 10,000 sq km	<b>1,710.5</b> Road/rail density per 10,000 sq km	

## Resilience (R) <sup>7</sup>

Score = 0.619, Rank = 5 of 25

Resilience is a function of both vulnerability and coping capacity. Moquegua’s resilience is higher than the national average, and its very high Resilience Score (R = 0.619) is due to its low vulnerability and very high coping capacity. The region’s baseline indicators suggest a focus for resilience-building efforts. In Moquegua, the thematic areas with the weakest relative scores are summarized in the table below. Readers can additionally consult Appendix 1 for a comprehensive assessment of its need for specific program types relative to other regions.

Table 5. The top 3 thematic areas with the weakest relative scores.

**Recent Disaster Impacts**

**Governance**

**Environmental Capacity**

<sup>7</sup> **Resilience** is a hazard-independent look at current socio-economic conditions affecting the short-term ability to absorb, respond to, and recover from disruptions to a region’s normal function.
